

S3L4-BurpSuite

Dopo aver mandato la richiesta di login con le credenziali valide, **intercetto** grazie a **BurpSuite** la richiesta:

The screenshot shows Burp Suite's Intercept tab with a request to `http://127.0.0.1/DVWA/login.php`. The request is a POST with the following body:

```
username=Lorenzo&password=Lorenzo&Login=Login&user_token=13ac044b53ce464305027286af35b896
```

The background image shows the DVWA login page with the username field circled.

Direttamente dalla **request** vado a cambiare le credenziali, negando di fatto il login (screen1):

The screenshot shows the modified request in Burp Suite's Request tab. The request body has been changed to:

```
username=Lorenzo&password=Lorenzo&Login=Login&user_token=13ac044b53ce464305027286af35b896
```

The Response tab shows the resulting HTML response from DVWA, which includes the text "Login failed" and a red error message.
